1364.0.15.001 - Treasury Model of the Australian Economy -- TSP Version, Dec 2010

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 13/04/2011

Summary

About this Release

The Treasury Macro-Economic (TRYM) model of the Australian economy has been developed and is used within the Commonwealth Treasury of Australia. The TRYM model was designed to assist in policy analysis and forecasting at the macro-economic level. The result is a model that is ideal for understanding the workings of the Australian economy and for economic research and analysis. The database is separately available as part of the Modellers' Database (cat. no. 1364.0.15.003). The TSP version of TRYM allows users to access individual equations and comes with a user guide for using TRYM in TSP. Users will need a copy of TSP Version 5.0 to run this version of the Model.

User should note that the TRYM model is presently undergoing a major redevelopment. The aim is to improve the model structurally and to update the operating environment of TRYM from TSP to EViews 7. Due to the change, the TSP release of TRYM will be discontinued with the roll-out of the EViews-based model. This is scheduled to occur in early 2011.

To subscribe to the TRYM model, please phone the Database Manager (02) 6252 7037.
